

Effective July 1, 2010, ANR is converting the following Section 311 Receipt and Delivery locations on its system to Part 284 Open Access locations. Currently Section 311 locations can only be utilized by customers with specific contracts and authority. By changing these locations to Part 284 Open Access locations there is no longer a limitation to using these locations and they are now available for nominations by any open access shipper. Some of these locations may have been inactive for some time; therefore if you plan to nominate one of these locations please contact your nomination representative prior to the commencement of flow. This change reflects ANR's on-going effort to provide our customers with greater flexibility in conducting their business.
