

ANR Scheduling Priorities and Route Information Tool

ANRPL Scheduling Priorities:

“If you own it and nominate it, you’re Primary. If you don’t own it and nominate it, you’re Secondary”

- **Every Firm Transportation Contract has a Primary Receipt Point, Primary Delivery Point, and a Primary Route. The Primary Route is defined as the shortest distance on the pipeline between the primary receipt point and the primary delivery point.**
- **Point Priority: When the Receipt and/or Delivery point in the contract is nominated, the Point Priority is Primary. All other nominated Receipt or Delivery points have a Point Priority of Secondary.**
- **Route Priority: Anywhere the nomination touches and flows along the Primary Route, the Route Priority is Primary. Anywhere the nomination does not touch or flows opposite the Primary Route, the Route Priority is Secondary.**
- **Nominations can have both Primary and Secondary Route Priorities depending on the nominated route.**
- **All of the above information is available in Gems and can be accessed from the Gems main menu by clicking on “Nominations” and then double-clicking on “Route Information Tool”. When the screen comes up enter your contract number then click enter or retrieve.**

Route Information Tool: Contract Route – SE to Sheboygan Nominated Route – SE to Centerpoint

To access from Gems menu:
Gems/Nomination/Route Information Tool

As an example:

The top screen shows a nomination that is Path-Primary and Point-Primary. By changing the Delivery Point the priorities have changed to Path-Primary and Point-Secondary.

Retrieve Criteria:

Nom ID: INTERNAL Receipt Loc ID: 103565 S E HEADSTATION
 Contract ID: Delivery Loc ID: 28831 SHEBOYGAN
 Effective Dt: Rate Schedule: Entity Name:

Locations In Route						Row 1 of 167
